New Issue & Call for Papers
**Journal for the Advancement of Performance
Information and Value (JAPIV)**

Introduction

We announce the release of the Journal for the Performance of Information and Value (JAPIV), Volume 8, Issue 2 (Winter 2016).

The full issue is posted (along with other journal info) at <http://cibw117.com/journal>.

Background / additional information

Performance information is a key contributor to process improvements and the development of the industry by providing quantitative and qualitative impetus. The industry can be defined as the built environment, the delivery of services, goods, and information technology. In addition, in order to sustain and improve the industry, new educational approaches are necessary. The value in performance information can be seen in the application of the information to: identify a challenge, improve or refine a process, and initiate change. The value can be perceived at numerous levels and entities within an organization or across a project.

The journal is open access, with all current and previous issues distributed online. We encourage anyone to register online to submit or be a reviewer for our journal who supports and works towards our goals.
