**Advances in Construction ICT and e-Business**  
**TG83: Construction in e-Business**

ISBN-13: 978-1138914582  
ISBN-10: 1138914584

**About the Book**

This internationally conducted study of the latest construction industry practices addresses a broad range of Information and Communication Technology applications. Drawing on research conducted in the US and UK, this book presents the state of the art of various e-Business processes, and examines BIM, virtual environments and mobile technologies.

Innovation is a theme that runs throughout this book, so in addition to the direct impact of these new technical achievements, it also considers the management styles that helped them to emerge. Examples from industry are illustrated with case studies and presented alongside research from some of the best known academics in this field.

This book is essential reading for all advanced students and researchers interested in how ICT is changing construction management and the construction industry.

For nearly two decades Routledge has been publishing much of the high quality research output generated through the CIB into its CIB Book Series. The construction industry has changed a great deal in that time, something that can clearly be seen in the broad array of Working Commissions and Task Groups that have emerged and evolved over the years. The publications in the Routledge/CIB Book Series reflect this changing landscape too, and according to the CIB press release you will be hard pressed to find such a wide ranging collection of expert construction research in book format elsewhere. This book is a major output of TG83 of which the Editors are Joint coordinators.

## Contents

1. Introduction
2. Exploiting e-Commerce in Construction
3. Advances in Electronic Procurement for the Construction Industry
4. Drivers for Electronic Procurement and Building Information Modelling in the Construction Industry
5. Building Information Modelling and Management
6. BIM in Practise – Industry case studies
7. Manchester Central Library and Town Hall Extension Project: The BIM journey so far of a public sector client
8. Project Extranets and Developments in Project Collaboration
9. Transforming Policy Documents into Intelligent 3 Dimensional Collaboration Tools
10. Impact of Collaboration Tools and Shaping the Future of Data Exchange: A model for BIM communication waste
11. Towards the Establishment of District Information Modelling
12. Capability Maturity Modelling of Construction e-Business Processes
13. e-Business Infrastructure and Strategic Frameworks
14. Innovation in e-Business: Issues related to adoption for micro and SME organisations
15. Application of Social Media in the Construction Industry
16. Social Media in Construction: An exploratory case study
17. Mobile Computing Applications within Construction
18. Envisioning Buildings: Advances in construction visualisations
19. The Multi Agent Paradigm in Construction e-Business and its Use in the Next Generation of Data-driven Decision Making Tools
20. Conclusions: Summary, the status quo and future trends

## Availability (Where to buy)

The Publication is for purchase at major book retailers such as [Routledge](#), [Amazon](#), [Waterstones](#), [Barnes & Noble](#), [Booktopia](#) and others.

If you order the book from Routledge directly all members of CIB are eligible for a discount of 20% on all Routledge titles bought through [www.routledge.com](http://www.routledge.com) by entering the discount code **DC365** at the checkout.
