## CIB Co-Sponsored Announcement SBE Conference Series 2018 - 2020

### The SBE Conference series is about to launch!

The first SBE conference of this three-year cycle will take place in Taipei on 14-17 October, followed by Eindhoven, on November 5-7.

And then there will be 13 more national/regional Sustainable Built Environment conferences in the series during 2019, climaxed by the World SBE conference in Gothenburg during 9-11 June 2020.

The WSBE20 event will provide opportunities for the SBE18-19 organizers to bring some of the best papers from their individual events and to take part in roundtables.

Don't miss the opportunity to participate in one or more of these high-quality events that feature peer-reviewed papers, excellent keynotes and SBE Roundtable sessions to discuss climate change and sustainability issues in the built environment.
