

**January 2016**

## **Forthcoming meeting**

# **42nd International Symposium of CIB W062 Water Supply and Drainage for Buildings August 29<sup>th</sup> to September 1<sup>st</sup>, 2016, Kosice, Slovakia**

### **Background**

CIB W062, founded in 1971, is the executive council of Building Water Supply and Drainage under the CIB and studies such areas as water supply systems and drinking water treatment (softening, heating etc.) inside buildings, water (waste and rainwater) drainage systems in buildings and household waste water treatment, energy saving and intelligent building.

### **The Symposium**

The International Symposium of CIB W062 Water Supply and Drainage for Buildings has been held 40 sessions in various countries and regions in the world. It is one of the most influential activities of the CIB, providing the highest-level international platform for academic exchange in water supply and drainage.

The 42nd International Symposium of CIB W062 Water Supply and Drainage for Buildings will come to Slovakia for the first time from August 29th to September 1st, 2016. The symposium, seeking openness, diversity, exchanges and development, will provide a high-level international platform for academic exchange, displaying the most advanced research achievements and deepening international cooperation for experts, researchers and professional persons in the building water supply and drainage field from all over the world. In the meantime, by bringing in cutting-edge technology and innovations, it is greatly conducive to promoting the research and development of new products and systems, achieving the goals of discovering more talents, advancing technology and international cooperation.

### **Theme**

The theme of the symposium is "Sustainable and water efficient buildings".

### **Paper Collection**

This symposium will be centered on seven topics:

1. Water supply hygiene security;
2. Water conservation and sustainability;
3. Drainage sanitation and indoor environment pollution control;
4. Application of renewable energy sources in water supply and drainage system;
5. Smart systems for water supply and drainage;
6. Standardisation;
7. Modelling and simulation of building water supply and drainage.

Original research papers on the seven topics will be collected from around the world and evaluated by experts organized by the council. The papers which pass peer review will be compiled and published, the authors of which will have a chance of presenting their works at the symposium.

### **Important Dates**

April 30, 2016 Deadline for abstracts  
May 31, 2016 Paper acceptance notification  
July 15, 2016 Deadline for final paper

### **Information**

[Visit the symposium website](#) for more information, including conditions for the papers and fees.
